RESPONSE TO RESTRICTION REQUIREMENT

Dear Sir:

In response to the Restriction requirement mailed on November 1, 2004,
Applicant elects the Group I claims (56-75 and 97-133) with traverse.

As noted in the Office Action, inventions are unrelated if it can be shown
that they are not disclosed as capable of use together and they have different
modes of operation, different functions, or different effects (note the word "and").
In the present case, the inventions defined as Groups I and II by the Examiner
clearly are disclosed as capable of use together, such that the restriction
requirement is improper.

The Examiner finds that the Group I claims (56-75 and 97-133) are "drawn
to a method/server/processing system for requesting resources from a mobile
network to a wireline network" and that the Group II claims (76-96) are "drawn to
a method for requesting hypermedia base resources." Even a cursory review of

the detailed description and drawings of the present application will reveal that hypermedia clearly is one of the main types of resources that the inventors contemplated could be requested/retrieved/processed with the invention defined in the independent claims of Group I. See also dependent claim 3, for example. Thus, independent claim 76 (of Group II) can be considered to more specifically claim an embodiment to which claim 56 is directed.

Because the inventions defined by the Group I and II claims clearly are disclosed as capable of use together, they are not unrelated. Therefore, the restriction requirement is improper and should be withdrawn. All claims in the present application should be examined together.

If there are any additional charges, please charge Deposit Account No. 02-2666.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP
